Your #1 Source for Warehouse Signs, Bar Code Labels, Card Holders & Shelf Magnets

Triangular & Cube Sign Assembly Instructions

Due to their size, these signs are shipped “flat” and simple assembly is required. Figures below illustrate a triangular (3-sided) assembly; follow the same procedure for a cube (4-sided) design.

Instructions:

1. On a flat surface (desk, table), set one sign face (side) upright just as it will hang to be read. Remove the adhesive tape backing liner.
2. Set next sign face upright on its edge - **make sure both faces have their lettering facing out.** Be certain both faces are standing flat on the surface and attach first face to second - Figure A.
3. Repeat procedure for remaining faces to form a triangle or cube. Sign should rest flat on all sides when faces are attached correctly - Figure B.
4. Insert S-hooks (at end of the hanging chain) into the hole in each side - Figure C.
5. Hang the sign from the overhead structure using additional chain, heavy duty fishing line, etc.

Questions? Call 800-851-8980 for assistance.
